6.2 Interconnection of Facilities

6.2.1 Any special interface equipment necessary to achieve compatibility between the facilities and equipment of the Company used for furnishing Communications Services and the channels, facilities, or equipment of others shall be provided at the Customer's expense.

6.2.3 Facilities furnished under the Company's tariffs or Price Lists may be connected to Customer-provided terminal equipment. All such terminal equipment shall be registered by the Federal Communications Commission pursuant to Part 68 of Title 47, Code of Federal Regulations, and all User-provided wiring shall be installed and maintained in compliance with those regulations.

6.3 Tests and Adjustments

If the Customer fails to do so, the Company may take whatever additional action is deemed necessary, including the suspension of service, to protect its facilities, equipment and personnel from harm.

SECTION 7. - SPECIAL CONSTRUCTION AND SPECIAL ARRANGEMENTS

7.1 Special Construction

Subject to the agreement of the Company and to all of the regulations contained in the Company's tariffs or Price Lists and upon Customer's request, the Company may undertake special construction and special arrangements on a reasonable efforts basis. Special arrangements include any service or facility relating to a regulated telecommunications service not otherwise specified under a tariff or Price List, or for the provision of service on an expedited basis or in some other manner different from the normal offering of service.

Where the Company furnishes a facility or service on a special construction basis, or any service for which a rate or charge is not specified in the Company's tariffs or Price Lists, charges will be based on the costs incurred by the Company and may include, (1) nonrecurring charges; (2) recurring charges, (3) termination liabilities; or (4) combinations thereof. The Customer and the Company shall negotiate an agreement for special construction the pricing for which will be set on an ICB basis and which will typically include a minimum service commitment based on the estimated service life of the facilities provided and early termination liability provisions.

SECTION 8. - SWITCHED ACCESS SERVICE**8.1 Switched Access Service**

The charges for such services shall be assessed at the rates set forth in the table below. Services may be provided directly by Company or in conjunction with a n affiliated, or unaffiliated, third-party.

8.2 Application of Tariff to VoIP-PSTN Traffic

VoIP-PSTN Traffic is defined as traffic exchanged between the Company and the Customer in time division multiplexing ("TDM") format that originates and/or terminates in Internet protocol ("IP") format. This section 8 governs the identification and compensation of VoIP-PSTN Traffic that is subject to compensation at rates equivalent to interstate access rates (unless the parties have agreed otherwise) pursuant to the Federal Communications Commission's Report and Order in WC Docket Nos. 10-90, etc., FCC Order No. 11-161. The terminating VoIP-PSTN Traffic identified in accordance with this tariff section, and in the absence of an interconnection agreement setting forth alternative rates and terms, will be billed at rates equal to Company's applicable tariffed interstate switched access rates as provided in the Company's FCC tariff, as reflected in the rate table below.

The Company affirms that all of its traffic either originates from or terminates to a VoIP end user and is, therefore, VoIP-PSTN, as defined in the FCC Order. Accordingly, the use of a traffic factor, for example in the form of a percent of VoIP usage (or "PVU") or otherwise, is unnecessary and will not be used unless Company otherwise agrees to the use of such a factor.

Transport Facility will be calculated based on the airline mileage between the access tandem (or functional equivalent) and the Company's End Office, Trunk Gateway, or functionally equivalent location within the applicable LATA.

The "establishment" of a call path and routing is achieved through equipment and facilities, including, in some cases, a soft switch or similar equipment, owned, or controlled through contractual or other arrangements, by the Company, which allows for the routing of voice communications between the Company's End Office, Trunk Gateway, or functionally equivalent location and End Users via SS7 signaling based on telephone numbers obtained by the Company and assigned to End Users as set forth in the LERG.
